

Soil Compaction Rammer

This compaction rammer is a powerful and efficient tool for construction and landscaping. It is ideal for compacting soil, gravel, and asphalt in trenches, foundations, and confined areas.

Product Overview

High-Performance Compaction

The RM80HL tamping rammer is a professional-grade soil compaction tool designed for demanding construction tasks. Featuring a 3.6KW engine, it delivers a powerful impact force of 10kn for efficient results in trenches and foundations. Its compact design and maneuverable plate size ensure reliable performance in confined spaces.

Technical Specifications

Equipment Details

Attribute	Value
Bottom Plate Size	34 x 28.5 cm
Jumping Strike	40-65 mm
Engine Model	GX160
Rated Power	3.6 KW
Impact Force	10 kn
Net Weight	78 KG

Performance Metrics

Operational Efficiency

13 m/min

Max Forward Speed

650 r/min

Max Percussion Rate

Logistics

Package Dimensions	780 x 480 x 1130 mm
Place of Origin	Changzhou, China
