Product Overview

High-Efficiency Electric Impact Rammer

The HCD80 electric impact rammer is a versatile compaction tool engineered for superior performance in confined spaces. It is specifically designed to handle a wide range of materials, including sand, gravel, asphalt concrete, and clay, making it an essential asset for road construction, foundation work, and trenching. Built with high-quality vibration damping blocks and durable springs, this equipment offers excellent anti-fatigue and anti-aging properties for reliable, long-term operation.

Technical Specifications

Model Number	HCD80
Country of Origin	Jining, Shandong, China

Applications

Primary Applications

- Road construction
- Bridge foundations
- Housing construction
- Dam and reservoir construction
- Indoor ground compaction
- Trench and narrow ground construction

Suitable Materials	Sand, Gravel, Asphalt Concrete, Lean Concrete, Clay
--------------------	---

Quality & Construction

Key Construction Features

Anti-fatigue • Anti-aging • Vibration Damping • Heavy-duty Springs
