Product Overview

Professional Soil Compaction

This robust plate compactor is designed for efficient soil and surface preparation in demanding construction environments. Powered by a reliable 5.0 HP engine, it delivers consistent performance for compacting materials with small cohesive force, such as river sand, gravel, and asphalt. Its durable construction and user-friendly design make it an essential tool for creating solid foundations for paving, pathways, and landscaping projects.

Technical Specifications

Engine Power

5 HP

Power Output

Engine Model

EY200

Applications

Suitable Materials

River Sand, Gravel, Asphalt, Soil

Design Features

Key Features

- Heavy-duty steel baseplate
- Vibration-dampening handles
- Optimized plate size for even leveling
- User-friendly controls
