

Soil Stone Burier

The Stone Burier is a soil preparation implement designed to bury stones, clods, and debris, creating a fine tilth seedbed. It features a robust rotor with tilling blades that rotate to dig into the soil, while a mesh roller compacts and levels the surface.

Product Overview

Professional Soil Preparation Solution

This heavy-duty stone burier is engineered for high-efficiency soil preparation in agricultural, landscaping, and construction environments. It features a robust rotor system that effectively digs into the soil, separating stones, clods, and debris to create a fine, level seedbed. Designed for compatibility with tractors, the implement ensures a clean and uniform surface, making it an ideal choice for preparing ground for lawns, gardens, and diverse crop planting.

Technical Features

Operational Capabilities

- Buries stones, clods, and debris
- Creates fine tilth seedbeds
- Surface leveling with mesh roller
- Adjustable depth control

Construction

Heavy-duty frame, Robust rotor, Tilling blades

Applications

Usage Areas

Agriculture • Landscaping • Construction • Lawn Preparation
