Product Overview

Professional Soil Tiller

This high-performance soil tiller is engineered for versatile soil preparation in greenhouses, paddy fields, and dry land applications. Featuring a robust transmission system with a combination of cast iron and aluminum alloy, the unit ensures exceptional durability and efficient power delivery. Its ergonomic design and intuitive controls allow for precise handling, making it an ideal choice for both professional farmers and serious gardening enthusiasts.

Technical Specifications

Engine Type	Rato Engine
Transmission Construction	Cast Iron, Aluminum Alloy
Drive System	Full tooth drive

Applications

Environment Suitability

- Greenhouses
- Paddy fields
- Dry land farming
