

Soil Tiller

This soil tiller is a robust machine designed for soil cultivation and preparation. It provides ample torque for breaking up compacted soil and creating a fine tilth suitable for planting.

Overview

Robust Soil Cultivation Performance

The DKCP360 Tiller is a robust and efficient machine engineered for optimal soil cultivation and preparation. Designed with a powerful engine and hardened steel tines, it delivers the torque necessary to break up compacted soil and create a fine tilth for planting. Its ergonomic handle and compact, maneuverable design make it an ideal choice for gardens, small farms, and landscaping projects.

Technical Specifications

Tine Material	Hardened Steel
Tilling Depth	Adjustable

Features

Key Features

- Ergonomic handle design
- Adjustable tilling depth
- Hardened steel tines
- Reliable drive system
- Compact and maneuverable

Applications

Ideal Use Cases	Gardening, Small Farming, Landscaping
