

Solar LED Lantern with USB Charging Port

This solar-powered LED lantern offers a sustainable lighting solution. It includes a USB port for convenient mobile phone charging.

Product Overview

Versatile Solar Lighting Solution

This high-efficiency solar-powered LED lantern is designed for reliable and sustainable illumination in any environment. Its cordless, rugged construction makes it an ideal companion for camping trips, emergency backup, and off-grid lighting needs. With an integrated USB charging port, it adds functional utility for keeping your essential devices powered during outdoor adventures.

Technical Specifications

Power Source	Solar Panel, Internal Battery
Auxiliary Charging	Yes
Port Type	USB

Usage & Applications

Best For

- Camping
- Emergency lighting
- Off-grid illumination

Design Characteristics

Rugged • Cordless • High-Efficiency
