

Solar LED Lantern with USB Charging

This solar lantern provides sustainable lighting with its integrated solar panel and dual LED lamps. It also features a USB port for convenient charging of mobile devices, making it suitable for remote use.

Product Overview

Versatile Off-Grid Lighting

The MRD405 solar lantern is a sustainable and reliable lighting solution engineered for off-grid applications. It features integrated solar charging technology and provides dual LED illumination, ensuring performance in remote locations. Designed for both indoor and outdoor environments, this compact lantern also functions as a power hub with a built-in USB port for mobile device charging.

Technical Specifications

Key Features

- Dual LED lamps
- Integrated USB port for mobile devices
- Portable, compact design
- Durable construction

Model Number

MRD405

Charging Options

Solar Panel, USB Charging

Package Contents

Included Adapters

Multiple charging adapters included for universal power outlet compatibility
