Product Overview

Solar-Powered Efficiency and Durability

This 10W solar outdoor wall light offers a self-sufficient, eco-friendly lighting solution for a wide range of residential and commercial applications. Engineered with a unique patented arm design, it ensures a wide lighting area and high brightness output. The unit is built to withstand harsh weather, featuring a durable alloy lamp body and IP65 waterproof certification for long-term outdoor reliability.

Technical Specifications

Waterproof Rating

IP65

Power Rating

10 W

Luminous Flux

1000 lm

LED Efficiency

190 LM/W

Key Features

Product specifications and design features including available colors and mounting capabilities.

Technology Features

- ALS2.0 technology for 6-8 rainy days autonomy
- PIR motion sensor with 120-degree detection
- Automatic dusk-to-dawn operation
- Patented arm design for expanded irradiation

Compliance & Certifications

CE, RoHS, FCC, TUV, ISO, Patent Protected
