Product Overview

Solar Panel Parallel Wiring Solutions

This solar panel parallel wiring harness is engineered using a unique dual molding procedure to ensure exceptional longevity and mechanical strength. Designed for rapid deployment, these cables are preassembled to customer specifications to facilitate quick and secure field connections. The robust construction provides high temperature resistance and superior impermeability for reliable outdoor performance.

Technical Specifications

Ingress Protection

IP68 Waterproof

Installation Features

- Preassembled configuration
- Color-coded wiring (Red/Black)
- Tool-less integration
- Fast plug-and-play assembly

Connector Type

Y-Branch, T-Connector
