

Solar Powered 36-LED Lantern

This solar-powered LED lantern provides reliable and energy-efficient lighting. It features 36 bright LEDs and a high-efficiency solar panel for charging.

Product Overview

Solar Powered 36-LED Lantern

The ODA-803-36LED is a solar-powered LED lantern designed for reliable and energy-efficient lighting. It features a high-efficiency solar panel for charging its internal battery, providing illumination without the need for mains power. The lantern incorporates 36 bright LEDs, offering a strong and consistent light output. Its durable construction ensures longevity and suitability for both indoor and outdoor use.

Technical Specifications

Number of LEDs	36
Power Source	Solar Powered

Features

Key Benefits

- Energy-efficient lighting
- No mains power required
- Sustainable lighting solution
- Cost-effective operation
- Durable construction

Ideal Applications	Camping, Emergency Lighting, General Area Lighting, Indoor Use, Outdoor Use
