

# Solar Powered Dual Light Wi-Fi Camera

This dual-light, low-power solar Wi-Fi camera is designed for wireless outdoor surveillance. It features integrated solar panels for continuous power and supports Wi-Fi connectivity for remote viewing and control.

## ADDITIONAL IMAGES

## Overview

### Solar-Powered Security Solution

This dual-light solar Wi-Fi security camera is designed for reliable, wireless outdoor surveillance without the need for complex wiring. Featuring intelligent low-power consumption technology and integrated solar charging, it offers an eco-friendly and durable security solution. With advanced features like PIR human detection, real-time mobile notifications, and a robust IP67-rated weather-resistant shell, it ensures stable performance in even the harshest environmental conditions.

## Power & Energy

Power Source	Solar Powered, Rechargeable Batteries
Battery Capacity	4 pcs

## Technical Specifications

Ingress Protection	IP67
Connectivity	Wi-Fi

## Features

### Core Functionalities

- Dual Light Source
- PIR Human Detection
- Motion Detection Alarm
- Remote Mobile App Access
- Intelligent Low Power Consumption
- Waterproof & Lightning-proof

Environmental Resistance	Waterproof, Lightning-proof, Moisture-resistant, Mildew-resistant
