

Solar Powered Emergency Flasher with LED Indicators

This solar-powered emergency flasher features multiple LED indicators. Designed for automotive use, it provides a bright, attention-grabbing signal for safety and visibility.

Product Overview

Solar Powered Emergency Flasher

This solar-powered emergency flasher is designed for automotive safety and high-visibility signaling. Equipped with integrated LED indicators, it provides a reliable warning signal for roadside assistance or emergency situations. The device features a self-charging solar panel, ensuring it remains ready for use without the need for external power sources.

Technical Specifications

Power Source	Solar
Lighting Technology	LED
Primary Applications	Automotive, Emergency Signaling, Roadside Safety, Warning Light

Key Features

Key Features

- Self-charging solar panel
- High-visibility LED indicators
- Durable construction for various conditions
- Designed for automotive use
