

Solar Powered Flexible Garden Lights

The solar powered flexible garden lights combine aesthetic appeal with energy efficiency, featuring flexible stems with flower-shaped LED lights. Powered by an integrated solar panel, these lights offer customizable arrangements and hassle-free operation, automatically turning on at night and off at dawn.

Product Overview

Innovative Solar Lighting Solution

The Solar Flexi Light is an efficient outdoor lighting solution designed to enhance gardens, patios, and pathways with aesthetic charm. Featuring flexible stems and realistic flower-shaped LED lights, this unit is powered entirely by integrated solar technology, requiring no external wiring for installation. With its weather-resistant construction and automatic dusk-to-dawn functionality, it provides a hassle-free and inviting warm white ambiance for year-round outdoor use.
