Product Overview

Sustainable Outdoor Illumination

This solar-powered garden lantern combines traditional aesthetics with modern energy efficiency. Utilizing a high-performance monocrystalline silicon solar panel, it provides reliable off-grid lighting for residential and public spaces without the need for trenching or external electricity. The durable, hot-dip galvanized steel structure ensures long-term performance in various environmental conditions, featuring advanced IP65 weather protection.

Technical Specifications

Protection Rating

IP65

System Voltage

DC 12V-24V

Wind Resistance

150 km/h

Operating Temperature Range

-30°C to 70°C

Pole Material

Hot-dip galvanized steel with plastic spraying

Performance

Performance Highlights

50000 hours

LED Lifespan

16 %

Solar Panel Conversion Rate

15 days

Rainy Day Backup

System Features

Anti-typhoon, Anti-humidity, Anti-UV, Maintenance-free Battery, Light & Time Control

Applications

Recommended Usage

- Urban roads
- Community squares
- Industrial parks
- Scenic spots
- Park green belts
- Residential gardens
