Product Overview

Solar Powered Garden Path Light

This solar-powered garden light offers an eco-friendly and cost-effective lighting solution for pathways, gardens, and outdoor spaces. It features a high-efficiency solar panel that automatically charges during the day and powers the light at night, eliminating the need for wiring or external power sources. With a durable, weather-resistant design, it provides reliable illumination for 6-8 hours on a full charge.

Technical Specifications

Dimensions	12 x 12 x 43 cm
Material	Plastic

Lighting Performance

Lumen Output

6 lm
Brightness

Color Temperature	Warm White (3000K), RGB
-------------------	-------------------------

Power & Battery

Battery Type	1x AA 500mAh Ni-Mh
Charging Time	6 hours
Working Time	6-8 hours

Features

Key Features

- High-efficiency solar panel
- Automatic day/night operation
- No wiring required
- Weather-resistant construction
