High-Performance Solar Illumination

This high-power solar LED barn light is designed for versatile indoor and outdoor applications, offering reliable illumination even during extended cloudy or rainy periods. With a separated solar panel and a 4-meter extension cable, it provides flexible installation options for garages, billboards, and general outdoor areas. The system features advanced power management technology, customizable brightness and timer settings via remote control, and a durable design built to withstand the elements.

Technical Specifications

Key Performance Metrics

190 LM/W

LED Efficiency

98 %

Light Transmittance

4 m

Extension Cable Length

Available Power Ratings

10W, 15W, 20W, 40W, 50W

Ingress Protection

IP65

Features

Lighting Capabilities

- Separated solar panel design
- Remote control for brightness and timer
- Battery power indicator
- All-night lighting capability
- Operational during 8-10 consecutive rainy days

Installation Versatility

- Flood light
- Wall lamp
- Indoor installation
- Outdoor installation
