

# Solar Powered LED Camping Lantern

This camping lantern is solar-powered and equipped with 7 LEDs. It has a 4-position button switch offering 3 lighting modes and provides 4-6 hours of continuous light when fully charged.

## Product Overview

### Efficient Solar Lighting Solution

This solar-powered camping lantern is designed for reliable outdoor illumination, featuring an integrated solar panel for sustainable charging. Equipped with 7 high-efficiency LEDs and three distinct lighting modes, it offers versatile brightness options for various camping and emergency scenarios. With a robust design and 4-6 hours of continuous operation on a full charge, it serves as an essential tool for off-grid lighting needs.

## Technical Specifications

### Continuous Operation

**4 Hours**

Min Runtime

**6 Hours**

Max Runtime

Light Source	7 LEDs
Battery Configuration	2 x 1.2V Rechargeable Batteries
Lighting Modes	3
Charging Method	Solar Panel, Integrated

## Logistics & Packaging

### Packaging Specifications

Metric	Value
Carton Size	68x51x52 CM
Units per Carton	32
Gross Weight	11 Kg
Net Weight	8.7 Kg
