Product Overview

Solar Powered Performance

The MARS2 solar wall light is an efficient, all-in-one outdoor lighting solution engineered for high brightness and ease of use. It features a powerful 2000LM output and flexible installation options with adjustable vertical and horizontal angles to direct light exactly where needed. Designed for durability, it includes a robust IP65 waterproof rating and automatic day-night cycling for hassle-free operation without external wiring.

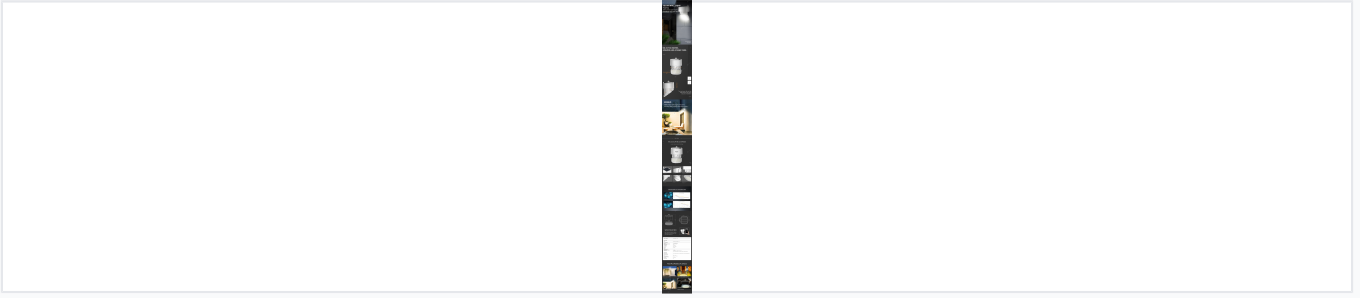

Technical Specifications

Brightness

2000 LM
Output

Battery Voltage	3.7 V
Battery Energy	14.8 WH
Color Temperature	4000 K
Protection Rating	IP65, IK10

Installation and Design

Showcasing the flexible light orientation and technical benefits of the MARS2 system.

Adjustability

- Vertical angle adjustment
- Horizontal angle adjustment
- Wall-mounted

Operational Features

Solar Powered • Wireless • Automatic Day/Night Switch • Motion Sensor

Applications

Best For

Front Door, Garden, Courtyard, Garage
