Product Overview

Sustainable Outdoor Illumination

This solar-powered LED path light offers an efficient, eco-friendly solution for illuminating gardens, pathways, and outdoor landscapes. Featuring a high-efficiency solar panel, the unit converts sunlight into electricity during the day to power the light automatically at night. With a durable, weather-resistant design, it provides reliable 3000K warm white lighting for 6-8 hours on a full charge.

Physical Dimensions

Dimensions (L x W x H)	13 x 13 x 54.8 cm
Body Material	Plastic

Performance Metrics

Luminous Flux

10 lumens
Brightness

Color Temperature	3000K (Warm White)
