

Solar Powered Motion Sensor Garden Light

This solar-powered light fixture is designed for both wall-mounted and ground-inserted configurations. It uses a PIR motion sensor to activate the LED illumination when movement is detected.

Product Overview

Solar Powered Motion Sensor Garden Light

This durable outdoor lighting solution features a versatile design suitable for both wall-mounted and ground-inserted applications. Constructed from weather-resistant materials like stainless steel, these lights are engineered for long-term outdoor performance in gardens, pathways, and entryways. Equipped with integrated PIR motion sensor technology, the units automatically activate upon detecting movement, ensuring energy-efficient operation and enhanced security.

Technical Specifications

Sensor Technology	PIR (Passive Infrared) Motion Sensor
Power Source	Solar Energy
Installation Options	Wall-mounted, Ground stake

Construction & Durability

Usage Environment	Outdoor • Weather-resistant
Primary Material	Stainless Steel
