

Solar Powered Motion Sensor Wall Light

This outdoor light is powered by solar energy and activated by motion. It is designed for wall mounting to provide illumination.

Product Overview

Solar Powered Outdoor Illumination

This versatile outdoor lighting solution utilizes solar energy to provide reliable illumination for pathways, gardens, and building exteriors. Featuring a durable cylindrical housing and an integrated solar panel, it offers both wall-mounted and ground-stake installation options to suit various landscaping needs. The motion-sensing technology ensures energy efficiency while providing security and visibility when needed most.

Technical Specifications

Design Features

- Cylindrical transparent housing
- Integrated top-mounted solar panel
- Motion sensor activation
- Weather-resistant construction

Installation Options

Wall Mount, Ground Stake

Housing Material

Durable Plastic and Stainless Steel

Power Source

Solar Energy
