Product Overview

Smart Solar Lighting Solution

This solar-powered outdoor wall lamp provides an eco-friendly and energy-efficient lighting solution for pathways, patios, and entryways. Designed with advanced human body sensing technology, it offers multiple lighting modes to balance security and power conservation. Its weather-resistant construction ensures reliable performance in diverse outdoor environments.

Technical Specifications

Sensor Detection Range

120 degrees

Detection Angle

5 meters

Maximum Detection Distance

Operation Modes

- Sensor Mode
- Dim Light Sensor Mode
- Medium Light Mode

Features

Key Capabilities

Solar Powered, Motion Sensor, Light Sensor, Weather-Resistant, Energy Efficient
