

Solar Powered Outdoor Wall Light

This outdoor wall light is solar-powered, removing the need for external wiring. It is constructed from durable materials with a dark finish and clear enclosure, designed for gardens, pathways, and building exteriors.

Product Overview

Solar Powered Outdoor Wall Light

The XLTD-300WB is a professional-grade solar wall light designed for efficient outdoor illumination. By utilizing advanced solar charging technology, this unit eliminates the need for complex electrical wiring, ensuring safe and easy installation on any building exterior. It provides bright, consistent white LED lighting, making it an ideal choice for enhancing security and visibility in gardens and along pathways.
