Product Overview

Smart Solar Lighting Solution

This energy-efficient, solar-powered outdoor wall light is designed to enhance security and illumination for pathways, gardens, and entryways. By harnessing sunlight during the day, the internal battery provides automatic, consistent lighting at dusk, eliminating the need for manual operation or complex wiring. Its weather-resistant construction ensures reliable performance, offering a sustainable and cost-effective lighting solution for various outdoor environments.

Technical Specifications

Power Source	Solar Energy
Integrated Sensors	Light Sensor, Motion Sensor
Lighting Technology	LED

Installation and Design

Durability

Weather-resistant • Durable Construction

Suitable Mounting Surfaces

- Walls
- Fences
- Outdoor Structures

Application

Ideal Applications

- Driveways
- Patios
- Gardens
- Entryways
- Pathways
