

Solar Powered PIR Motion Sensor Light

This solar-powered light has a PIR motion sensor for automatic activation. Designed for outdoor use, it provides illumination when motion is detected.

Product Overview

Solar Powered Motion Security Lighting

This solar-powered door light provides an efficient, wire-free solution for outdoor illumination. Equipped with an integrated PIR (Passive Infrared) motion sensor, the unit automatically activates upon detecting movement, making it ideal for securing doorways and pathways. The self-contained design charges via a built-in solar panel during the day, ensuring reliable performance without the need for complex electrical installations.

Technical Specifications

Recommended Applications

- Doorways
- Pathways
- Outdoor Security Zones

Operation Mode

Motion Activated • Automatic

Power Source

Integrated Solar Panel

Sensor Technology

PIR (Passive Infrared) Motion Sensor

Installation

Wireless / Self-contained
