

Solar Powered Snake and Mole Repeller with Multi-Pulse Vibration and LED

This solar-powered device repels snakes and moles using multi-pulse vibrations. It also features an optional LED light for additional deterrence.

Product Overview

Humane Pest Deterrence

The HCX-K715L Solar Snake and Mole Repeller offers an eco-friendly and maintenance-free solution for protecting gardens and lawns. By utilizing multi-pulse vibrations combined with LED emissions, it effectively deters pests such as snakes, moles, and voles without the use of harmful chemicals. Designed for reliability, the unit operates autonomously using integrated solar power.

Technical Specifications

Coverage Range

625 Sq. M.
Area

Operating Frequency

400Hz - 1000Hz

Power & Energy

Battery Capacity

800 mAh

Power Source

Solar Panel, Rechargeable Battery

Features

Repelling Methods

- Multi-Pulse Vibration
- LED Light Emission

Build Quality

Weather-resistant • Outdoor Rated
