

Solar Powered Ultrasonic Animal Repeller

This solar-powered device uses ultrasonic sound waves and flashing LED lights to deter animals. Equipped with a motion sensor, it activates automatically when animals are detected, providing a humane and effective pest control solution for gardens and lawns.

Product Overview

Effective Outdoor Deterrent

The HCX-K716 is a versatile ultrasonic repeller designed to safeguard gardens and outdoor areas from unwanted wildlife. Utilizing a combination of ultrasonic frequencies and motion-activated sensors, it effectively deters pests such as rodents, raccoons, and birds. Its weather-resistant design and solar-powered operation ensure reliable performance and low maintenance for residential and commercial outdoor spaces.

Performance Metrics

Key Performance Indicators

300 Sq. M.

Cover Range

8 meters

PIR Detection Distance

Technical Specifications

Target Species

- Mice and Rats
- Skunks
- Dogs and Cats
- Foxes
- Deer
- Raccoons
- Squirrels
- Martens
- Birds
- Bats

Frequency Range

13.5KHz – 45.5KHz

Power Options

Solar Panel, 3 x 800mAh Ni-CD Batteries, 9V 200mA Adapter
