

Solar Rechargeable LED Flashlight

This solar rechargeable LED flashlight is designed for versatile illumination. It recharges with sunlight and features super bright LEDs with a beam distance that can reach 30 feet.

Product Overview

Sustainable Illumination Solution

This solar-rechargeable LED flashlight offers a reliable and eco-friendly lighting solution for diverse professional and personal needs. Designed with integrated solar technology, it eliminates the dependency on disposable batteries by utilizing rechargeable NiMH power. Its robust build quality ensures dependable performance in both indoor and outdoor environments, making it an essential tool for emergency preparedness or routine maintenance.

Technical Specifications

Battery Type	3 AA 800 mAh NiMH rechargeable
Solar Panel Input	0.6 W

Performance Metrics

Operational Performance

8 hours
Charging Time

10 hours
Working Time

Physical Dimensions

Dimensions (cm)	22 x 9.2 x 5.5
Dimensions (inches)	8.66 x 3.62 x 2.17

Product Features

Available Colors	Multiple Colors
