

Solar Silicon Material for Direct Casting - 5kg Packaging

This solar silicon material is designed for direct casting processes. It is packaged in 5 kg quantities to ensure quality during furnace applications.

Product Overview

Professional Grade Solar Silicon

This high-quality silicon material is specifically engineered for use in direct casting furnaces. Designed for efficiency and purity, it is supplied in convenient 5 kg packaging units to streamline your production process. This material is ideal for professional applications within the metallurgy and nonmetal mining engineering sectors, ensuring consistent quality for your furnace operations.

Technical Specifications

Packaging Weight	5 kg
Material Type	Solar Silicon

Application

Primary Applications	Direct Casting Furnace, Metallurgy, Nonmetal Mining Engineering
----------------------	---

Logistics

Format
Disposable • 5kg Unit
