

# Solar Street Light with Integrated Photovoltaic Panel

This solar street light integrates a photovoltaic panel for energy harvesting. It uses an LED luminaire to provide efficient illumination for roadways and public spaces.

## Product Overview

### Sustainable Outdoor Lighting

This solar street light features an integrated photovoltaic panel designed for efficient energy harvesting in various outdoor environments. Engineered for durability and high performance, it utilizes advanced LED luminaires to provide reliable illumination for roadways, pathways, and public spaces. This system offers a cost-effective and environmentally friendly solution for professional lighting needs.

## Technical Specifications

### Key Components

- Integrated Photovoltaic Panel
- High-efficiency LED Luminaires
- Durable Pole Structure
- Energy Harvesting System

### Suitable Applications

Roadways, Pathways, Public Spaces
