

Solar Thermal Station with Integrated Components

This solar station features two hydraulic lines, pre-integrated fittings and complete foam insulation. The design ensures low installation costs.

Product Overview

Solar Thermal Control Solution

This pre-integrated solar thermal station simplifies the installation process by combining hydraulic lines, circulation, and control components into a single compact unit. Designed for both residential and small commercial applications, it ensures efficient management of solar water heating systems. The station comes fully equipped with a high-performance circulation pump, safety features, and a precision differential controller for optimal energy distribution.

Technical Specifications

Connection Size	3/4 inch
Operation Pressure	6 bar
Relief Valve Rating	3 bar

Components

Integrated Components

- Circulation pump (Wilco RS 15/6)
- Three-sensor differential controller
- Safety relief valve
- Hydraulic lines
- Brass fittings

Physical Dimensions

Unit Dimensions

43 cm

Length

24.5 cm

Width

10 cm

Depth

Insulation

Complete foam insulation
