

Solar Water Heating System

This solar water heater system includes a solar collector panel and a storage tank. It provides an eco-friendly and cost-effective solution for residential and commercial water heating.

Product Overview

Solar Heating Efficiency

This high-efficiency solar water heating system is engineered to maximize solar energy absorption using advanced collector technology. The integrated insulated storage tank ensures minimal heat loss, maintaining a consistent hot water supply for end users. It offers a sustainable, cost-effective solution for both residential and commercial hot water needs.

Technical Specifications

Included Components

- Solar collector panel
- Insulated storage tank

Key Benefits

Eco-friendly • Cost-effective • High-efficiency • Insulated

Applications

Residential, Commercial
