

Solid Belt Bench Vise

This bench vise is designed for secure clamping of workpieces in workshop environments. Constructed from high-quality materials, it features a solid belt design for smooth operation and consistent clamping force.

Overview

Robust Solid Belt Bench Vise

The GS Series Vise is a robust and durable tool engineered for secure clamping and holding of workpieces across a wide range of applications. Constructed from high-quality materials, this vise delivers exceptional strength and rigidity, while its solid belt design ensures smooth, reliable operation and consistent clamping force. Featuring precision-machined jaws, it provides accurate gripping and prevents slippage, making it an essential addition to any metalworking or woodworking workshop.

Technical Specifications

Key Features

- Solid belt design for smooth operation
- Precision-machined jaws
- High-strength construction
- Consistent clamping force

Performance Highlights

1 High

Clamping Consistency

1 High

Jaw Precision

Suitable Applications

Metalworking, Woodworking, General-purpose
