

Solids Handling Water Pump

This high-performance pump is designed for demanding applications. Its reliable engine efficiently handles water containing solids and debris within construction sites, agricultural settings, and during flood control.

Overview

High-Performance Solids Handling Pump

This robust trash pump is engineered for demanding fluid transfer tasks, capable of handling water containing solids and debris with ease. Powered by a reliable 9HP engine, it delivers high-volume flow and significant lift, making it an essential tool for construction sites, agricultural irrigation, and emergency flood control. Its durable frame design ensures longevity and portability in harsh working environments.

Engine Performance

Engine Power	9 HP
Displacement	270 cc
Bore x Stroke	77 x 58 mm

Operational Metrics

Key Performance Indicators

1300 L/min
Max Flow Rate

27 m
Max Lift Head

7 m
Suction Depth

Solids Handling Capacity	35 mm
