Product Overview

Silent Diesel Generator Performance

This sound-dampened diesel generator set is engineered for high-reliability power generation in environments where noise reduction is a priority. It features a robust, weather-protected enclosure suitable for residential, commercial, and industrial applications. Equipped with an advanced control panel for real-time monitoring and essential safety features like automatic shutdown, this unit ensures stable and efficient operation.

Technical Specifications

Frequency	60 Hz
Safety Features	Low Oil Pressure Shutdown, High Temperature Shutdown, Sound Dampened Enclosure, Weather Protection

Maintenance & Operation

Daily Maintenance Requirements

- Check radiator water level
- Check reserve tank water level
- Check engine oil level
- Check diesel fuel level
- Verify 50/50 Freeze/Water mixture

Operational Steps

Phase	Action
Pre-start	Check pipes, leads, and switch main power ON
Starting	Turn key to ON, press start button, release key
Stopping	Turn key to OFF, allow cool down, press stop button
