Product Overview

Sleep Support and Ambient Relaxation

This advanced sound therapy machine is designed to improve sleep quality by masking environmental noise and creating a calming atmosphere. It combines 18 distinct audio options with a rhythmic ambient light feature that simulates human breathing to help regulate heart rate and promote relaxation. Compact and portable, this device is an ideal solution for bedrooms, offices, or travel-based sleep assistance.

Technical Specifications

Power Performance

5 V

Input Voltage

2 A

Operating Current

3 W

Rated Power
