

Soundproof Diesel Generator Set

The soundproof diesel generator set delivers reliable power generation with minimized noise levels. Its robust enclosure reduces sound emissions, making it suitable for noise-sensitive environments.

Product Overview

Professional Diesel Power Generation

This soundproof diesel generator set is engineered to provide reliable and consistent power in noise-sensitive environments. Featuring a robust sound-dampening enclosure, it effectively minimizes acoustic output while maintaining high operational efficiency. The unit is designed for versatile use across industrial facilities, residential areas, and demanding construction sites.

Technical Specifications

Frequency	50 Hz
Certifications	CE

Key Features

Core Components

- Robust soundproof enclosure
- High-efficiency diesel engine
- Integrated control panel for monitoring
- Advanced cooling system
- Built-in safety protection systems
