General Overview

Robust Power Solution

This soundproof and weatherproof diesel generator set is engineered for reliable power generation across industrial, commercial, and residential environments. It features a highly durable, corrosion-resistant enclosure designed to minimize noise while protecting critical components from the elements. With a focus on operator safety and ease of maintenance, this unit provides a stable and efficient power source for long-term operations.

Construction & Durability

Powder Coating Process

- Part preparation and pre-treatment
- Powder application
- Curing

Corrosion Resistance

Zinc-plated fasteners, Stainless steel fasteners, Anti-rust paint, Powder coated steel components

Maintenance

Maintenance Features

- Full-length extra wide doors on each side
- External lube oil drains
- External cooling water drains

Safety & Security

Safety & Security Measures

Lockable access doors • Emergency stop button • Guarded cooling fan • Guarded charging alternator • Enclosed exhaust system

Control Panel Access

Viewing window included in a lockable access door
