

Sourcing and Procurement Management Service

This service facilitates the efficient flow of goods from international suppliers to domestic factories. It manages purchasing orders, customs clearance, and distribution, optimizing the supply chain.

Service Overview

Comprehensive Procurement Management

This service provides an integrated supply chain solution, streamlining the flow of goods from international sources to domestic manufacturing facilities. By managing complex purchasing workflows, customs documentation, and logistics, the service ensures seamless authorization and distribution. It is designed to support high-volume manufacturing environments by maintaining a consistent supply of materials from agents and distributors abroad.

Supply Chain Mechanics

Operational Flow

- Inbound procurement from international agents and distributors
- Centralized purchasing order (P/O) authorization
- Managed customs clearance and import filing
- Strategic distribution to domestic manufacturing units

Service Capabilities

Logistics & Compliance
