Product Overview

Professional Electrical Distribution

The GTLS Series distribution boxes are designed for safe and reliable power control in residential, commercial, and light industrial environments. Built with high-quality steel sheet and a durable polyester powder-coated finish, these enclosures ensure long-term performance and corrosion resistance. The wider internal layout is specifically engineered for ease of wiring and efficient heat dissipation.

Technical Specifications

Electrical Performance

100 A

Rated Current

240 Vac

Max Service Voltage

Compatibility & Design

GE THQL Breaker Compatible, Single-phase, Three-wire, Flush Mounted, Surface Mounted

Construction

Build Quality

Feature	Details
Material	Steel Sheet
Thickness	0.5-1.2mm
Finish	Matt-finish Polyester Powder Coat
Way Count	8-Way

Installation Features

- Knockouts on all sides
- Top and bottom cable entry
- Hinged access door
- Secure latching mechanism
