

Soy Milk Maker 1.5L

This high-performance soy milk machine is designed for efficient and reliable operation. It features durable construction, optimized blending technology, and user-friendly controls.

Overview

Professional Performance

The SL-108 V-Blender is a high-performance soybean milk machine engineered for reliable daily operation in commercial or professional settings. With its optimized blending technology and robust 1.5L capacity, it ensures efficient preparation of fresh soy milk and various blended beverages. Designed with user-friendly controls, this machine combines durability with precision to meet the demands of busy kitchens.

Technical Specifications

Motor Power	350 W
Heating Power	800 W
Capacity	1.5 L
Voltage/Frequency	220-240V, 50/60Hz
Model	SL-108 V-Blender

Features

Key Attributes	Durable Construction, Optimized Blending, User-Friendly Controls
