

Spa Water Circulation Pump

This pump is designed for various spa applications. Its compact design allows for straightforward installation and integration into existing spa systems.

Product Overview

High-Performance Spa Circulation

This spa water circulation pump is engineered for continuous duty and high reliability in demanding spa environments. Built with durable techno-polymer components and a heavy-duty motor, it ensures efficient water flow and long-lasting performance. Designed for easy integration, this pump is an ideal solution for both residential and commercial spa systems.

Certifications

Certifications	CE, ISO 9001, UL
----------------	------------------

Operating Conditions

Maximum Working Pressure	0.3 MPa
Max Ambient Temperature	40 °C
Liquid Temperature Range	5-50°C

Technical Construction

Material Specifications

Component	Material
Pump Body	Techno-polymer
Impeller	Techno-polymer
Mechanical Seal	Carbon / Ceramic / Stainless Steel
Motor Housing	Aluminum / Cast Iron
Shaft	Carbon Steel / Stainless Steel

Motor Specifications

Motor Characteristics

- Single Phase Heavy Duty
- Continuous Work Duty Cycle
- External Ventilation Cooling
- Insulation Class B / Class F
- Protection Class IP44 / IP54
