

Speaker Switch Control Cable

This cable is designed for controlling speaker switches individually. It features a copper strand core for optimal conductivity and a PVC outer jacket for insulation and protection.

Product Overview

Versatile Audio Control Solution

The Speaker Switch Control Cable is specifically engineered for the individual management of speaker switches within audio setups. Featuring high-quality copper strand cores, it ensures optimal conductivity and consistent signal integrity for professional applications. The durable PVC outer jacket provides reliable insulation and protection against environmental factors, while multiple color options allow for efficient cable management and identification in complex installations.

Technical Specifications

Available Wire Gauges	12ga, 18ga
Core Material	Copper strands
Jacket Material	PVC

Customization

Color Availability	Yes
