

Spear Point Drill Bit Set for Tile and Glass

Specialized drill bits designed for drilling through tile and glass. These bits feature a spear-pointed tip made from hard materials like tungsten carbide to prevent cracking and chipping.

Product Overview

Precision Drilling for Fragile Materials

This specialized drill bit set is engineered specifically for drilling through delicate surfaces like tile and glass. Featuring a durable spear-pointed tip constructed from tungsten carbide, these bits are designed to minimize the risk of cracking or chipping during operation. The versatile set includes a range of sizes to handle diverse drilling requirements and is fully compatible with standard drill chucks for seamless integration into your existing tool kit.

Technical Specifications

Key Features

- Anti-cracking spear-point design
- Hardened material construction
- Multiple size configurations
- Quick-change compatibility

Tip Material	Tungsten Carbide
Tip Geometry	Spear-Pointed
Compatible Materials	Tile, Glass
Compatibility	Standard drill chucks
