

Spherical Roller Bearing 22313CA

This spherical roller bearing's outer ring raceway is spherically formed, allowing for self-alignment. The rolling elements make linear contact with the inner and outer ring raceways, enabling it to withstand heavy radial loads in machinery used for mining, metallurgy, and paper production.

Product Overview

High-Performance Spherical Roller Bearing

The 22313CA Spherical Roller Bearing is engineered for demanding industrial environments where high radial and axial loads are present. Featuring robust construction and optimized internal geometry, this bearing delivers exceptional load-carrying capacity and reliable operation. Designed to meet exacting standards, it ensures long service life and minimal maintenance requirements in heavy machinery and industrial gearboxes.

Product Details

Model Number	22313CA
Bearing Type	Spherical Roller Bearing

Quality & Standards

Certifications	ISO 9001:2008
