

Spherical Roller Bearing 230/630

This high-capacity spherical roller bearing is designed for heavy-duty applications. It accommodates misalignment and shaft deflection.

Product Overview

Heavy-Duty Spherical Roller Bearing

The 230/630 spherical roller bearing is engineered for demanding industrial environments requiring superior load-carrying capacity. Its robust construction features precision-machined rollers and raceways that effectively distribute loads while accommodating shaft misalignment and deflection. This high-capacity component is ideal for heavy-duty machinery applications where durability and reliable operational performance are essential.

Technical Specifications

Boundary Dimensions

Dimension	Value	Unit
Outer Diameter (D)	920	mm
Bore Diameter (d)	630	mm
Width (B)	212	mm

Unit Weight 509 KGS

Material GCr15SiMn
