

Spherical Web Camera with LED Modules

This web camera features a spherical design with integrated LED modules. It is suitable for video conferencing, streaming, and surveillance applications.

Product Overview

Advanced Spherical Web Camera

This high-resolution spherical web camera is engineered for versatile professional use, including video conferencing, live streaming, and surveillance applications. It features a unique central lens design surrounded by integrated LED modules, ensuring superior performance even in low-light environments. The unit is supported by a stable silver-colored base and includes an integrated display screen for real-time status monitoring.
