Product Overview

Professional Spiked Roller System

This spiked plastic roller cover, paired with a heavy-duty roller frame, is engineered for specialized surface preparation and texturing tasks. Featuring precisely spaced rigid plastic spikes, the tool ensures consistent performance for drywall finishing and aeration. The ergonomic frame design allows for smooth, controlled rotation, making it an essential implement for professional contractors and high-end finishing projects.

Technical Details

Primary Applications

- Drywall Texturing
- Substrate Preparation
- Surface Aeration
- Specialized Finishing

Key Features

Ergonomic Grip • Consistent Spacing • Smooth Rotation • Pro Grade

Material Composition

Rigid Plastic, Durable Construction
