

Spiked Ring Fastener

This spiked ring fastener consists of a flexible ring with evenly spaced spikes. The threaded metallic spikes ensure a secure grip when screwed into materials.

Product Overview

High-Strength Engineered Fastening

The Spiked Ring Fastener is a specialized solution designed for heavy-duty industrial and construction applications. Its flexible, circular architecture allows for effective surface conformity, while the evenly spaced, threaded spikes ensure superior holding strength and stability across both flat and irregular materials. This fastener is an ideal choice for projects requiring a robust, distributed grip where traditional hardware may fall short.

Technical Specifications

Design Type	Flexible Spiked Ring
Fastening Mechanism	Threaded Spikes
Compatibility	Curved Surfaces, Irregular Surfaces, Heavy-Duty Construction
